

For plastic containers

PLASTICAP AGRO

Our closure systems meet the highest standards for solid and liquid filling goods.

Together with our customers we create new standards that support the requirements of the agrochemical market.

Tri-Sure[®]
MORE THAN CLOSURES

Plasticap Agro

Tri-Sure®'s experience and insight of the global agrochemical market has led to growth through constantly meeting customers expectations.

Diversification of the range is accomplished with the use of various liner specifications, coupled with cost effective venting solutions. Tamper evident versions allow us to support nearly every customer request.

Ensuring maximum security

The robust Plasticap Agro is available with a child resistance closure system and tamper-evident ring. Tri-Sure® More Than Closures offers a global network of sales and service centers, a multi-plant back up supply program and technical support. The Plasticap Agro really is the first choice for companies that value the ultimate solution for protecting their product and ensuring the safety of their workplace.

Design

The design of the Tri-Sure® Plasticap Agro is fully customizable. It can be embossed or printed with special instructions, promotional language, or your company logo.

MPV3 option

Some agrochemicals packed in containers can consume or release air due to fluctuations in temperature and pressure. This can cause expansion, collapsing or even bursting of the container.

The robust Tri-Sure® Plasticap Agro is available with our innovative Micro-Porous Venting solution. The MPV3 solution offers the combination of a special venting insert, a PE foam pierced disc and a unique thread design which allows two-way venting and helps to maintain the container's integrity.

Customer support

With more than 85 years of experience, we are consistently enhancing our product range to meet the ever changing needs of our customers.

The Plasticap AGRO closure system is the first choice for companies that value the highest protection levels for their solid and liquid agrochemicals.

Options
