

For plastic containers

PLASTIPLUG™ PLASTIC PLUGS

Proven globally on millions of plastic containers, Plastiplug™ plastic plugs can now accommodate the uniquely designed all-plastic tamper evident Push-Lock™ cap.

Tri-Sure®
MORE THAN CLOSURES

PLASTIPLUG™

Maximum flexibility

The full range of Plastiplug™ plastic plugs is designed to meet the special characteristics of plastic containers and is used worldwide to close and seal millions of containers.

Ensuring maximum security and tamper-evidence

In combination with the Push-Lock™ cap, which securely locks directly into the central recess of Plastiplug™ plastic plugs, the Push-Lock™ closure system provides all-plastic protection against pilferage or substitution of the drum's contents.

It's a unique combination

This unique combination takes "Easy on / Easy off" to a new level. No tools of any kind are required. The Push-Lock™ caps can be efficiently and securely applied by hand on Plastiplug™ plastic plugs. Once applied, Push-Lock™ caps can be effortlessly and conveniently removed by hand.

Supported by Tri-Sure® More Than Closures' global sales and technical support network, the

innovative range of Plastiplug™ plastic plugs really are the first choice for companies who want a simple and reliable, plastic closure solution.

Highest performance

Applied correctly on virtually any plastic drum neck, the Push-Lock™ closure system assures unmatched levels of all-plastic sealing performance and tamper-evidence.

A full range of Plastiplug plastic plugs

Available standard in white or virgin PP, these plugs provide an excellent quality finish, dimensional consistency and sealing performance. Plastiplug™ plastic plugs are available with a range of washers, including PE, and EPDM. Numerous venting options, including EPDM-mushroom and micro porous venting devices, are available for specific applications.

Note: vented closures should only be used with materials which will not interfere with the operation of the vent. Prior testing is strongly advised.

Push-Lock™ Compatible (PLC) PLASTIPLUG™ plastic plugs Standard executions

- BCS G2x5-PLC-Buttress threaded plug
- BCS 56x4-PLC-Buttress threaded plug
- BCS G2x11.5-PLC-NPS threaded plug
- BCS 70x6-PLC-Buttress threaded plug

Advantages

- ✓ Designed to meet the special characteristics of plastic containers.
- ✓ Push-Lock™ Compatible (PLC) for maximum all-plastic tamper-evidence.
- ✓ Full range of Tri-Sure® closing tools and adaptors for optimal sealing performance.
- ✓ The entire range of Plastiplug™ plastic plugs is compliant with ISO-20848 Part 3.

Because we produce to the highest standards required by our customers, any mixing of our closure components with inferior "look-alike" products will negate your warranty. So make sure you use only components made by Tri-Sure® More Than Closures. The ultimate in closure security.

The Plastiplug™ / Push-Lock™ Cap closure system in action

Compliance

Plastiplug™ plastic plugs are fully compliant with the ISO Packaging Standard for Plastic Drums (ISO-20848 Part 3).

Support

Tri-Sure® More Than Closures' global technical team can provide hands-on technical assistance—including neck inserts, technical drawings and testing to ensure the correct neck dimensions and thread configurations. This ensures the perfect match between drum necks and Plastiplug™ plastic plugs.

All Plastiplug™ plastic plugs are designed by Tri-Sure® More Than Closures for maximum performance in combination with the Push-Lock™ Caps.
