

For plastic, metal and fiber containers

LIDS & TOPS

Tri-Sure® lids and tops are designed to securely close open head containers. Various specifications, profiles and sizes are available to meet your product and market requirements.

Tri-Sure®
MORE THAN CLOSURES

Lids & Tops

For more than 40 years Tri-Sure® has supplied drum lids and tops to all major packaging manufacturers. We serve all kinds of applications for solid and liquid products meeting the highest standards.

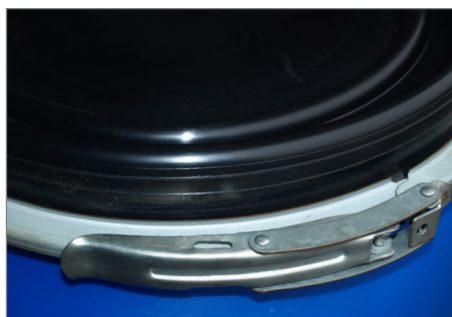

Plastic covers, lids and tops

Plastic covers, lids and tops are designed to secure plastic, metal and fiber open head packages and are available in various sizes and specifications.

In combination with different closure openings, customers are able to fill or empty the drums without removing the lid. This makes the drum suitable for handling in automatic filling lines.

A full range is available

Standard raw material is high-density polyethylene. We can serve a full range of lids for containers starting at 20 L up to 220 L.

Standard Tri-Sure® plugs and caps are available for lids with closure openings.

Different venting systems can be integrated into the lid or as part of the closure. Standard EPDM gaskets are fitted unless otherwise specified.

On top of the above we can also supply a lug-lid assembled with corresponding closing-ring reducing complexity, handling and labor cost during the filling process.

For other colors, please contact your local Tri-Sure® representative.

Truly global

Combined with Tri-Sure® More Than Closures global network of sales and service centers, technical support and tooling, the Tri-Sure® closure system really is the first choice for customers who demand the highest quality, especially those dealing with hazardous or expensive contents.

Advantages
