MEASURING CUPS

Tri-Sure® measuring cups are designed to accurately measure liquid and solid substances. Various types, profiles and sizes can be customized to meet your product and market requirements.

Tri-Sure®
MORE THAN CLOSURES

Measuring cups

For more than 20 year we are serving different market segments with various styles of measuring cups. Measuring cups are frequently provided to allow accurate measurements for proper mixing. Without proper proportions, the fill product may not achieve the desired performance characteristics intended by the manufacturer, or in the worst case, the wrong mixture can become harmful to the user.

Material

The cups are made of neutral colored polypropylene conforming to FDA standards. This transparent material makes it easy to check and read the quantity of the product in the cup.

Scales

Several scales for liquid and solid products are available. Different unit values can be applied on one cup for multiple scaling needs. International standards such as millimeters and ounces may be combined. Our volume range starts at 20 ml and ends at 500 ml.

Shape

Any shape like rectangular, conical, cylindrical or a combination of more shapes is possible. For large measuring cups a separate, stand-alone foot is available as an option. Another shape that can be supplied are measuring spoons.

Food compliance

Raw materials are Food and Drug Administration (FDA) and EEC food compliant.

Design and product development

Color options and designs are available upon request, subject to minimum order quantities. The measuring cups can be printed or embossed with your company logo and usage instructions. We have the ability to take your idea from concept to reality including the in house mold fabrication.

Advantages

- ✓ Various sizes and shapes available.
- ✓ In house mold capabilities.
- ✓ Customized designs.
- ✓ High quality print or embossed available.
- ✓ More than one scale in one print possible.
- ✓ Injection and printing in house.
- ✓ Food approved raw materials.

Truly Global

Combined with Tri-Sure® More Than Closures' global network of sales and service centers, technical support and tooling, the Tri-Sure® closure system really is the first choice for customers who demand the highest quality, especially those dealing with hazardous or expensive contents.
