

INNOVATION

For plastic containers

PLASTICAP™ IBC SCREW CAP HIGH FLOW VENT-IN

Plasticap™ IBC screw cap with an Integrated High Flow Vent-In is the optimal and most cost effective venting solution for fast, easy and safe IBC discharge.

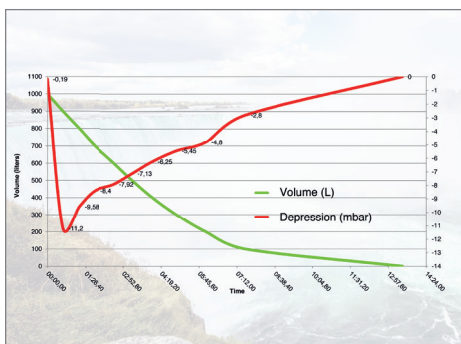

Tri-Sure®
MORE THAN CLOSURES

Plasticap™ IBC Screw Cap High Flow Vent-In

Our New High Flow Vent-In Plastiplug™ is available in a 56x4 or G2 execution. Supplied as a complete ready to use solution, with a 160 mm IBC Screw cap and protected by our Push-Lock™ cap for perfect tamper evidence and protection.

The yellow Push-Lock™ cap is printed with the warning message "HIGH FLOW VENTING INSIDE". The Plastiplug™ is made from Polypropylene (PP), and the IBC Screw cap and Push-Lock™ Cap are made from High Density Polyethylene (HDPE).

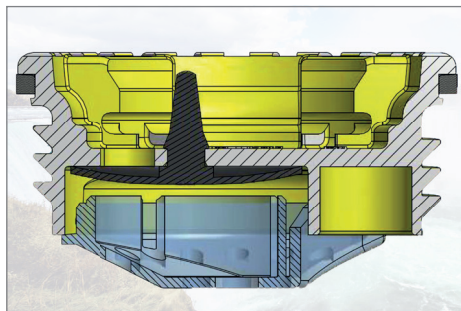

Highest performance

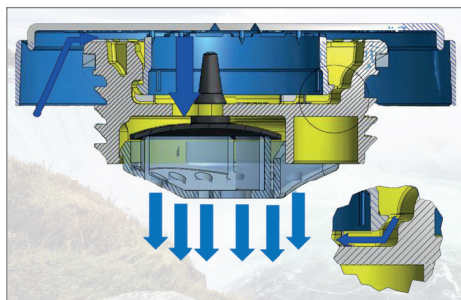

With a 2" IBC Bottom valve, this innovative solution gives a discharge flow of 500 liters in under 3 minutes without permanent deformation of the IBC (collapsing). As soon as the bottom valve is closed, the IBC will be secure and contents are protected from any external contamination.

How does it work

The specific design of the High Flow Plastiplug™ allows safe transportation of the IBC and its content.

As soon as the operator opens the bottom valve to empty the contents, the specifically designed umbrella-vent opens to let a high flow of air into the IBC.

Customer support

As world leader in closure systems we provide complete support for fitting application.

Our technical staff can also offer practical advice for best and safe use of our Plasticap™ IBC screw caps.

Executions

Depending on the application and chemical product that is transported in the IBC, the High Flow Vent-In IBC screw cap is available in both an EPDM or VITON execution.

Standard

- EPDM IBC Screw cap washer.
- BCS 56x4 threaded Plastiplug™ plug execution.
- PE plug washer.
- Black EPDM Umbrella vent - Neutral protective bulb.

Optional

- VITON IBC Screw cap washer.
- G2-type threaded Plastiplug™ plug execution.
- VITON plug washer.
- Black VITON umbrella-vent - Green protective bulb.
- Additional 2-way Micro Porous Breather-vent.

Advantages

- ✓ Integrated design with Plastiplug™ and Push-Lock™ providing a total plastic solution; to avoid corrosion and safety issues.
- ✓ The High Flow Vent-In IBC Screw cap is supplied as one completely assembled item.
- ✓ Light, Robust & Reliable for a cost effective venting and sealing solution.
- ✓ UV resistant
