

For metal and plastic containers

UNI-GRIP® 60C SPOUTS

The Uni-Grip® 60C is a crimp-on plastic closure with an integrated spout designed for small and medium metal and plastic containers.

It's a true convenience closure, combining a plastic cap with a pull-up spout and tamper-evident bails which guarantee product integrity.

Tri-Sure®
MORE THAN CLOSURES

UNI-GRIP®

CLOSURE SYSTEM

How does it protect?

The entire Uni-Grip® 60C is designed for durability and security. The lifting bails are secured by breakaway webs that provide visual evidence of tampering. There is also a tamper-evident, ring-pull membrane in the spout that must be removed before pouring. This ring also helps prevent the spout membrane from rupturing in case of impact.

Ensuring maximum security worldwide

The Uni-Grip® 60C is designed to work in perfect combination with the Tri-Sure® MoreThan Closures Uni-Grip® manual and pneumatic tooling which assures optimal sealing and tamper evident capability. Combined with Tri-Sure® MoreThan Closures' global network of sales and service centers, the multi-plant back up supply program and technical support, the robust Uni-Grip® 60C Spout really is the first choice for companies that value the ultimate solution for protecting and dispensing their product.

Re-use

Integrated plastic cap can be easily re-applied to re-seal the remaining contents.

Thoughtful design

Opens faster and easier

The tamper-evident lifting bails can be easily removed, even with gloves on.

Ideal dispensing

The Uni-Grip® 60C Spout features a full pour standard opening for maximum emptying. It is available with an optional anti-glug, self-venting spout that provides for a smoother pour. The unique design permits optimal drainability, minimizing waste and protecting the environment.

Promoting your product

Uni-Grip® Spouts can be printed or embossed with your company logo, promotional language or special instructions.

Options

- Oversized cap can be printed or embossed with your design or product information.
- Subject to minimum order quantities a full array of colors and custom designs is available.

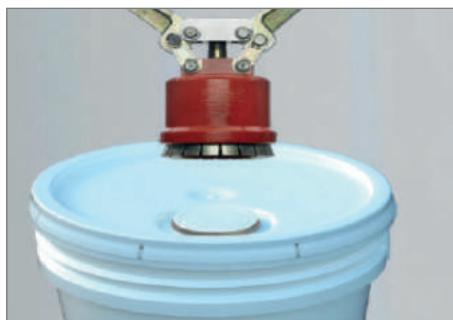

Advantages

- ✓ Extra-large bails can be opened faster and easier, even with gloves on. They will snap back into the ring in a nested position.
- ✓ Ring-pull diaphragm has a reinforced structure for added rupture strength during impact.
- ✓ Compliant with food regulations.
- ✓ Extremely tamper-evident.
- ✓ Self-venting.
- ✓ The oversized cap reduces the possibility of contamination and splash-back.
- ✓ Printing and embossing options.
- ✓ The 'Snap-Bead' that is provided on the cap will secure the spout for unwanted popping up during transport or atmospheric pressure changes.

Full customer support

As expected of the world leader in industrial closure systems, we provide a complete system to support application and removal of Uni-Grip® Spouts. A full range of manual and pneumatic tools are available to ensure proper fitting of Uni-Grip® Spouts. Our technical staff can also offer practical advice on achieving optimal sealing and tamper-evident performance.
