For plastic containers

PLASTICAP-51[™] SCREWCAP

Plasticap-51[™]
is the fast, flexible
and cost-effective
closure system
for high-demand
UN applications
and is designed
for optimal sealing
and security of small
and medium-sized
containers.

PLASTICAP-51™

How does it protect?

The Plasticap-51™ screwcap with protected tamper evident ring is made from High Density PE (HDPE) with an integrated expanded PE sealing washer (other washer solutions also available). The combination provides a light yet robust and reliable solution for our customers.

Ensuring Maximum Security

Combined with Tri-Sure's worldwide global network of sales and service centers, we provide tooling and technical support for the Plasticap-51™ screwcap. The robust Plasticap-51™ closures system really is the first choice for companies that value the highest protection levels for hazardous or valuable contents.

Highest Performance

The unique Plasticap-51™ design and construction ensures safety under the most extreme conditions.

Ease of Use

Designed with a protected tamper evident ring to provide you with the highest level of security. That makes it easy to use, even when wearing gloves. Designed with a consistent start of thread for exact positioning, which further enhances automation on filling lines.

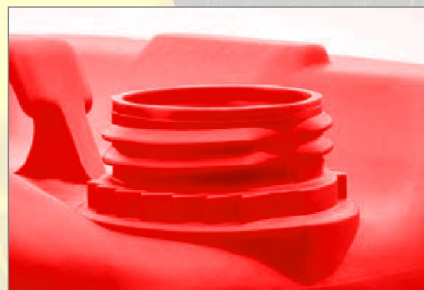

Promoting Your Product

Customization available through embossment or printing with your company logo or special instructions.

Full Customer Support

As expected of a world leader in industrial closure systems, we provide a complete system to support application and removal of the Plasticap-51™ screwcap. Plastic application, removal tools and special aluminum torque wrenches are available to ensure proper fitting of the screwcap. Our technical staff can also offer practical advice on upgrading your current container with the Plasticap-51™ closure system.

All Tri-Sure® Plasticap-51™ closures are designed for maximum performance in combination with the Tri-Sure® neck design (DIN 50).

Options

- Standard Plasticap-51™ supplied with expanded PE washer.
- Plasticap-51™ available with Tri-Sure® patented MPV3 venting solution.
- Plasticap-51™ with microporous, high-volume "venting in & out" solution with splashguard.
- Available with induction heat seal solutions.
- Numerous washer options.
- Available with a variety of printing and embossing options.
- Subject to minimum order quantities, a full array of colors and customer designs are available.

Advantages

- Proven and customizable design.
- Light, robust and reliable for a cost-effective sealing solution.
- Compliant with food regulations.
- Consistent design for automatic filling line application.
- Protected tamper-evident ring design improves security performance.
- FSSC 22000, Global Food Safety Initiative factory produced.
