

SEALING COLLAR™ FOR REUSABLE DRUM

Reuse more. Replace less.

A premium resealing solution engineered to restore the original closure system of reconditioned steel drums following high-temperature furnace processing, providing reliable protection against leakage while ensuring that original drum performance levels are restored.

ENGINEERED TO DELIVER WHAT MATTERS

FLANGE GASKET RECOVERY

Failed flange gaskets can be re-used with the application of the Tri-Sure® Sealing Collar. EPDM or BUNA material available.

LOWER CARBON FOOTPRINT

Reuse drums and covers instead of replacing them - reducing material costs while delivering up to 66.3% CO₂ reduction.*

DRUM COVER REUSE

Original drum covers can be re-used with the application of the Tri-Sure® Sealing Collar.

EASY, PROVEN APPLICATION

Simply place the Sealing Collar™ with gasket over the original flange, crimp it into position and install the drum closure as usual.

CONSISTENT DRUM PERFORMANCE

Properly installed with Tri-Sure® application tools, the Sealing Collar™ helps maintain current drum performance ratings throughout the reconditioning process.

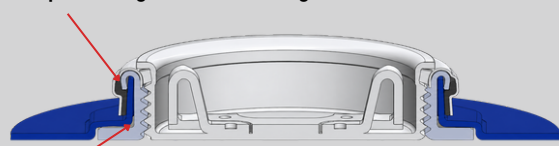

PREMIUM PROTECTION

A robust sealing solution with Chromium 3 passivation for superior corrosion protection - ideal when reliable containment of hazardous or high-value contents matters most.

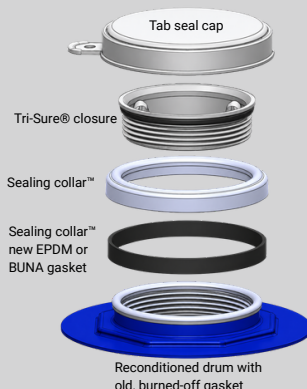

EXTEND DRUM LIFE. THE SMARTER WAY TO REUSE.

After furnace reconditioning, the original flange gasket is burned off and can no longer provide an effective seal. The Sealing Collar™ adds a new gasket over the existing flange, restoring sealing capability and enabling safe drum reuse.

Crimped Sealing Collar™ With new gasket

Flange gasket burned off after furnace reconditioning

KEY BENEFITS

Enables a Circular Economy. Reuse steel drums, covers and side flanges

Reduces Costs. Avoid unnecessary drum cover replacement.

Lowers Carbon Emissions. Reduce environmental impact

Maintains Drum Performance. Preserve performance ratings

DESIGNED FOR

20 TO 210LTS METAL DRUMS | REUSABLE PACKAGING | HIGH-TEMPERATURE FURNACE PROCESS

PROVEN CO₂ SAVING

*Up to **66.3%** New steel drum vs recon drum with Sealing collar

PLACE → CRIMP → REUSE
