# UNI-GRIP® SPOUT WITH PROBLUE™ WITH FLAME MITIGATION DEVICE

The Uni-Grip™ ProBlue™ Spout with Flame Mitigation Device (FMD) actively prevents flame flashback—protecting people, products, and facilities handling flammable liquids.

## OVERVIEW

- **Active Flame Mitigation Device (FMD)** prevents flame jetting and flashback ignition
- **Protects workers and facilities** handling flammable liquids
- **ProBlue™ chemical-resistant resin** reduces vapor loss and maintains product integrity
- **Self-venting design** ensures smooth, efficient flow
- Compatible with standard steel pail systems
- **Secure crimp-on installation** for reliable sealing
- **Certified to meet and exceed ASTM F3429/F3429M**

## WHY CHOOSE UNI-GRIP WITH PROBLUE™ WITH FMD

- Actively **reduces ignition** risk and helps prevent flame jetting
- **Protects personnel, facilities, and assets** from ignition-related incidents
- **Supports ESG and insurance safety goals** through proven flame mitigation technology
- **Minimizes liability exposure** by using certified safety design
- **Delivers consistent, reliable performance** backed by Tri-Sure® engineering
- Trusted by leading chemical packaging professionals

## APPLICATIONS

- Racing fuels and fuel additives
- Solvents, paint thinners, and industrial chemicals
- Products with flashpoints below 60°C / 140°F
- Steel pail packaging systems
